GENERAL

The solid top/utility serving counter has 16 gauge stainless steel exterior and interior double-wall construction, reinforced with 12 gauge Galvanized steel hat-channels and base framing. Solid stainless steel bottom is standard. All exterior surfaces shall be ground and polished to a #4 finish.

*Powder-coated units' exteriors and bottoms will be constructed with 16 gauge paint-lock steel. The interior and exterior of the unit base will be powder-coated. All interior sides (back, top, left, right) are 18 gauge stainless steel.

TOP

Top shall be one-piece 16 gauge 300 series stainless steel (14 gauge available). The top will be cross braced for rigidity.

ELECTRICAL CHARACTERISTICS

Optional 115 volt electrical outlet may be added.

CASTERS

Unit shall have 4 heavy-duty 5" casters, 2 locking through-bolted to the 12 gauge hat-channels.
